Total Charge: \$ ____ USD

Once payment is received, there is no refund. Prices subject to change.

Aquatic Mammals “Goes Green”

Aquatic Mammals is sincerely concerned about the use of consumables such as paper, ink, and mailing envelopes. The journal’s editors, Editorial Board, and sponsors—the [European Association of Aquatic Mammals](#), the [Alliance of Marine Mammal Parks and Aquariums](#), and the [International Marine Animal Trainer’s Association](#)—want to minimize the impact of journal publications on the environment. As a result, we have made several changes over the last five years. In 2004, *Aquatic Mammals* committed to printing the journal on paper made with 30% post-consumer recycled content while retaining a high standard for print quality. In 2005, the journal made manuscripts available as PDF online format through [Ingenta](#) and ProQuest. In 2009, the journal made progress toward this goal by adopting an electronic manuscript management system, [Manuscript Fast Track](#), which allows authors, reviewers, and editors to exchange articles via a paperless, online method.

Section 1.01 As of 2010, the journal will make further changes toward this goal:

Real-Time, Online Journal —Once an article has been peer-reviewed and accepted for publication, it will be immediately formatted by [Document and Publication Services \(DPS\)](#). After review of the galley proofs by the editors and authors, a final PDF of the article will be made available to the authors for distribution. No more waiting for months for an accepted article to be available for distribution!!! Articles will have a volume number, an issue number, a DOI number, and page numbers, so they will be immediately citable. As soon as an entire issue is available, all articles will be placed online through [Ingenta](#) and ProQuest.

On Demand Print Option—Journals often needlessly print large numbers of an issue that take up storage space and add to the cost of publication. As a result, [Document and Publication Services](#) has an “On Demand” hard-copy option. The editors of *Aquatic Mammals* realize that in some circumstances a hard copy of an article or a whole issue is needed by authors or subscribers or by a library to continue their holdings of the journal. DPS can print one or multiple hard copies of a single article or of a whole issue for the author(s)’ or subscriber’s specific needs or for library collections. In addition, four CDs per year can be produced if requested by a subscriber or library. These small changes will not reverse global warming or staunch the relentless depletion of natural resources; however, the [editors and Editorial Board of *Aquatic Mammals*](#) support environmentally responsible activities and want the journal to play its part in conservation.
