

**Prevalence of Skin Lesions and Injuries in
Australian Humpback Dolphins (*Sousa sahulensis*) and
Indo-Pacific Bottlenose Dolphins (*Tursiops aduncus*)
in Moreton Bay, Queensland**

Supplementary Tables

Table S1. Primary and secondary skin lesion categories of nontraumatic and traumatic classification for Australian humpback dolphins (*Sousa sahlensis*) and Indo-Pacific bottlenose dolphins (*Tursiops aduncus*) in Moreton Bay, Queensland

Primary lesion category	Description	References
Nontraumatic		
<i>Annular lesion</i>	Ring-like lesion with light grey centre with concentric rings	Van Bressem et al., 2015; Hupman et al., 2017
		
<i>Dark lesion</i>	<i>Black spots</i> – Hyperpigmentation; small black dots. Can be slightly raised. <i>Dark centre</i> – Hyperpigmentation, dark grey colour in centre, lighter outer fringe, and irregular in shape	Van Bressem et al., 2008; Toms et al., 2020 Chabanne et al., 2012; Hupman et al., 2017
		
	<i>Other</i> – Dark in colour, irregular shape, no light fringe, and doesn't fit other definitions	Chabanne et al., 2012
	<i>Tattoo-like skin disease</i> – Stippled lesion that can be grey or black in colour. Can have dark border that fades to a lighter colour as it regresses. Shape can be irregular, round, or ring-like.	Geraci et al., 1979; Van Bressem et al., 2003, 2015; Chabanne et al., 2012; Powell et al., 2018
		

Orange spots/film

Non-raised orange or rusty coloured dots or blotches. Film on surface of skin.

Maldini et al., 2010; Yang et al., 2013;
Van Bressem et al., 2015

Pale dermatitis

Irregular, slightly raised sores that are pale in colour. Ulcerated or velvety appearance.

Van Bressem et al., 2015

Pale lesion

Lighter than surrounding skin. Can be circular or amorphous and irregular in shape. Smooth and even with the surface of the skin.

Wilson et al., 1997; Yang et al., 2013

Nodular

Nodular, raised bumps, rounded at top. Can be normal skin colour, orange, reddish, or ulcerated lumps on skin.

Van Bressem et al., 2009, 2015;
Chabanne et al., 2012; Yang et al., 2013

Targetoid

Dark fringed – Light centre with dark ring fringe

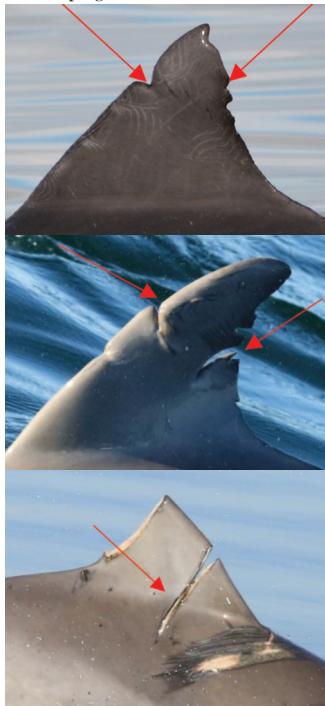

Wilson et al., 1997; Chabanne et al., 2012

Light fringed – Dark centre with light ring fringe

Traumatic*Abrasions/excoriations*

Rake marks – Multiple parallel lines or scrapes from conspecific bites; single tear/scrape.

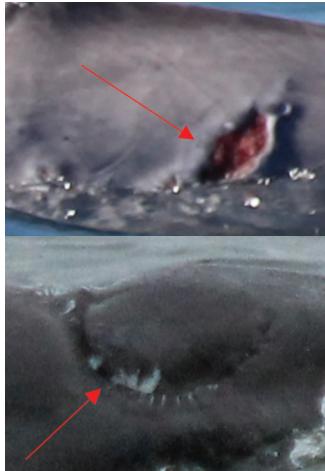

Scott et al., 2005; Chabanne et al., 2012; Luksenburg, 2014

Anthropogenic

Entanglement in debris or fishing gear – Clean cuts with indentations on opposing sides of the dorsal fin, tail fluke, peduncle, or pectoral fin. Dorsal fins with linear marks that are linked to mutilations or injuries, including collapsed or missing dorsal fins, tail flukes, or pectoral fins.

Wells et al., 1990; Wells & Scott, 1997; Baird & Gorgone, 2005; Kiszka et al., 2008; Chabanne et al., 2012; Luksenburg, 2014

Boat/propeller strike – Sequence of parallel clean cuts or scarring with a greater distance between cuts than rake marks. Clean v-shaped indentation on the peduncle, flank, or dorsal fin from vessel propeller or hull.

Bite wounds

Fresh bite wounds – Crescent-shaped wounds with evident crescent shaped rake marks, often with tears and scrapes associated with shark teeth. Space between scrapes are larger than those caused by conspecifics. Bite wound is fresh, and the epidermal layer is broken.

Corkeron et al., 1987; Heithaus, 2001; Chabanne et al., 2012; Smith et al., 2017

Healed bite wounds – Crescent-shaped scarring with evidence of rake marks caused by a shark bite. Epidermal layer is healed.

Indentation

Depression along the caudal peduncle or dorsal fin that can be irregular or cleanly shaped

Luksenburg, 2014; Félix et al., 2018

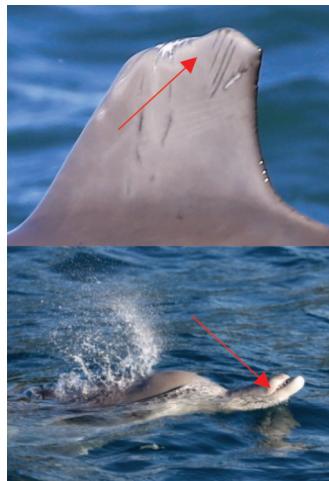

Laceration/incision

Clean cut or gash across the epidermal layer

Chabanne et al., 2012

Missing tip

Tip of a body segment (dorsal fin, tail fluke, or rostrum)
has been cut off or deformed

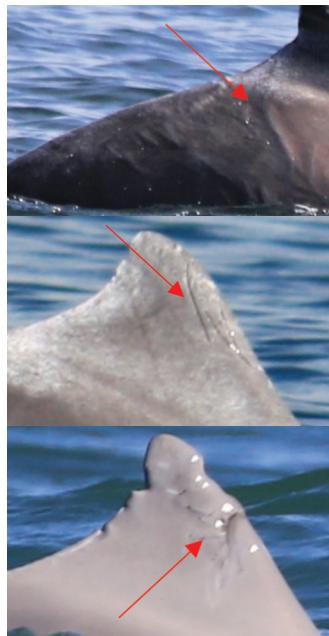

Luksenburg, 2014; Félix et al., 2018

Open wound

Fresh, open wound from an unknown source

Unknown scarring

Raised – Elevated, healed scarring from an unknown source

Chabanne et al., 2012; Hupman et al.,
2017

Depressed – Scars that appear sunken from unknown source

Other – Unclassified scarring from an unknown source

Humpback and Bottlenose Dolphin Skin Lesions

Table S2. Percentage agreement in the categorisation of lesion type between observers for humpback and bottlenose dolphin assessments

Trauma classification	Primary lesion category	% observer agreement	
		Humpback	Bottlenose
Nontraumatic	Annular lesion	80.0	--
	Dark lesion	60.9	71.8
	Orange spots/film	60.0	100.0
	Pale dermatitis	--	0.0
	Pale lesion	78.9	100.0
	Nodular	50.0	85.7
	Targetoid	43.2	95.0
Traumatic	Abrasions	99.8	97.5
	Anthropogenic	64.0	92.5
	Bite wounds	60.6	100.0
	Indentation	91.4	95.4
	Laceration	76.9	--
	Missing tip	88.9	98.3
	Open wound	80.0	75.0
	Unknown scarring	93.6	96.9

Table S3. Prevalence of primary skin lesion extent categories on Australian humpback and Indo-Pacific bottlenose dolphins in Moreton Bay, Queensland. Low extent equates to < 20% of the visible epidermis being covered in lesions, medium equates to 20 to 50%, and high equates to > 50%. The table shows the prevalence of lesions according to each primary lesion type. All lesions recorded on different body segments on the same individual were tallied according to extent category. For example, if an individual exhibited low extent of dark lesions on the flank and medium extent on the caudal peduncle, both were scored against the correspondent extent categories.

Trauma classification	Primary lesion category	Humpback						Bottlenose					
		Lesion extent:		Low		Medium		High		Low		Medium	
		n	%	n	%	n	%	n	%	n	%	n	%
Nontraumatic	Annular lesion	--	--	1	1.1	1	1.1	--	--	--	--	--	--
	Dark lesion	22	24.2	--	--	--	--	41	41.0	6	6.0	--	--
	Orange spots/film	6	6.6	--	--	--	--	6	6.0	--	--	--	--
	Pale dermatitis	--	--	--	--	--	--	1	1.0	1	1.0	--	--
	Pale lesion	17	18.7	3	3.3	--	--	22	22.0	2	2.0	1	1.0
	Nodular	1	1.1	--	--	--	--	4	4.0	--	--	--	--
	Targetoid	17	18.7	--	--	--	--	25	25.0	2	2.0	1	1.0
Traumatic	Abrasions	60	65.9	36	39.6	25	27.5	84	84.0	54	54.0	19	19.0
	Anthropogenic	8	8.8	3	3.3	1	1.1	25	25.0	4	4.0	1	1.0
	Bite wounds	27	29.7	23	25.3	4	4.4	24	24.0	6	6.0	1	1.0
	Indentation	9	9.9	4	4.4	--	--	33	33.0	1	1.0	--	--
	Laceration	1	1.1	1	1.1	--	--	--	--	--	--	--	--
	Missing tip	2	2.2	2	2.2	--	--	10	10.0	7	7.0	1	1.0
	Open wound	3	3.3	1	1.1	--	--	2	2.0	--	--	--	--
	Unknown scarring	33	36.3	9	9.9	--	--	54	54.0	5	5.0	1	1.0
	Total # individuals	76	83.5	54	59.3	28	28.3	94	94.0	65	65.0	23	23.0
