

## Letter from the Managing Editor

Dear Readers:

Thank you for your interest and support of *Aquatic Mammals*. With this open letter, I invite you to spend some quality time meandering through our improved website! The URL is the same: <https://www.aquaticmammalsjournal.org>. Even the content, 50 years of science publications (!), is mostly in the same locations as in our previous layout.

The updated website offers a presentation of our content that is more vibrant, refreshed in appearance, and, I believe, more readily accessible to the reader. All articles published in *Aquatic Mammals* are presented in the “Issues” category, which can be found under *Issues* in the menu bar at the top of the home page (Figure 1). Once you click on “Issues” in the dropdown menu, you will see all of the volumes that have been published for the journal (Figure 2). Clicking on a volume leads the reader to the cover graphics that depict each issue (Figure 3). Click on an issue to see all of the articles in that particular issue (Figure 4). Click on an article to learn more about that paper (and to download the PDF if you are a subscriber), to download the PDF if it is Open Access, or to add the PDF to your shopping cart. Any articles that are Open Access are identified as such on the specific abstract page.

Also under *Issues* you will find the “Hardcopy” category, which will lead you to the print version of each volume and issue available for purchase (Figures 2 & 3). Subscription options for purchase can be found on the home page under *Subscriptions* at the upper right of the menu options.

Supplemental materials are also available under the *Issues* menu option. These are extra graphs, tables, figures, or videos that augment some of the published papers in the journal.

The “Historical Perspectives” series participant list per year is now visible via the dropdown menu by holding your cursor over the menu option for the series. To view the interviewee clips, become a subscriber!

Also available on the new website is a plethora of information on *Aquatic Mammals* policies, staff details, and frequently asked questions.

The journal’s first website was more than ten years old. I’m very proud of our new and improved website and thank CyberSense LLC for creating our new look.

Happy reading! Cheers!

Kathleen M. Dudzinski, Ph.D.  
Managing Editor, *Aquatic Mammals*
